Gli utensili antiscintille a base berillio-cobalto (Beryllium Copper) non devono essere usati in contatto
 con sostanze di carattere infiammabile o con apparecchiature che funzionano con scintille.
 L'uso improprio può essere causa di danni alla strumentazione per l'uso in ambienti esplosivi.
 Beta Sparkless Tools cannot be used in contact with explosives or with devices that produce
 sparks.
 Improper use may result with the copper-beryllium tool surface being completely covered
 with any explosive vapours.
